Jim,  
CMP submitted a petition to re-open the record to avoid the protection subdistrict around Beattie Pond. Attached is the information they submitted along with the petition. One of the items is a series of photosimulations from Beattie Pond. Can you please take a look at these and let me know if they are technically correct and accurate. I am particularly interested in the placement of the structures that are blocked only by vegetation from the view at Beattie Pond.

Thanks and call or email if you have questions.
