

Town of Phippsburg/Kennebec Estuary Land Trust: Collaboration to Increase Social Resilience in Midcoast Maine

[Kennebec Estuary](#)

COASTAL COMMUNITY GRANTS: Coastal Resiliency

PROJECT PARTNERS

Bowdoin College, The Nature Conservancy, Casco Bay Estuary Partnership, Wells National Estuarine Research Reserve, Maine Sea Grant and Maine Cooperative Extension and the Kennebec Estuary Land Trust.

PROJECT DESCRIPTION (Anticipated completion December 2021)

This project will bring together representatives from the municipal, emergency response, social service, and conservation community to take part in a facilitated scenario planning exercise that simulates a coastal hazard event in the southern Midcoast region. Participants will take part in a table-top exercise to illustrate how each would engage in preparation for and recovery from a storm event designed to highlight opportunities for the sectors to coordinate more effectively to determine how, if at all, they included the element of 'social vulnerability' in their work planning for the impacts of and recovery from coastal hazards.
