Virex 256	Scot Custodial Supply 503-581-5733	QT-10 (400 ppm)

Check with your distributor of Tanning equipment and supplies for one of these sanitizers.

This list is of known products; others may exist and will be included as they are evaluated by the agency.

Products not included on the list may have the proper chemicals for sanitizing. However, they do not have dilution instructions required for use on tanning equipment surfaces. Most over-the-counter sanitizers have too strong a concentration resulting greater than 1000 ppm QT check. Products are tested with pH Hydrion Quat-Chek 1000 and QT-10 for dimethyl benzyl ammonium chloride or n-alkyl dimethyl benzyl and/or n-alkyl dimethyl ethyl ammonium chloride parts per million (ppm).

Examples of sanitizers and cleaners NOT approved:

**Windex
Formula 409
Lysol
Barbarcide**
