

Bird Beak Investigation Procedure

At each table, you will:

- Choose a 'beak' for each group member to test.
 - Take turns testing.
- You have 1 minute to use your beak to move as much food from the bowl to your bird's 'stomach' or cup.
- At the end of 1 minute, count how many pieces of food you were able to move.
- Write that number in the correct box on your worksheet.
